BWT bestmin

Filter system with BWT Magnesium Technology

Perfect mineralisation of low-salt water

BWT bestmin PREMIUM is a filter system especially for the mineralisation of low-salt water. It is ideal for use downstream of reverse osmosis systems and for producing hot beverages of all kinds for coffee and vending machines.

A sufficiently high mineral content in the water is important for the best possible coffee taste. Otherwise, the taste is often flat, even at high coffee doses. In addition, the coffee powder can swell up too much, causing a negative impact on the brewing process.

BWT bestmin PREMIUM filter cartridges bring the mineral content back into balance.

In particular, they increase the content of the key flavour carrier magnesium. BWT bestmin PREMIUM also reliably removes unwanted ingredients such as particles, organic components and chlorine.

The filter system consists of a filter cartridge with a BWT besthead filter head screwed onto it. Check valves in the filter head prevent return flow and uncontrolled water escape. Food-safe BWT bestmin PREMIUM filter systems are pressure-resistant and safe. They can be operated worldwide in any drinking water system and with any coffee or vending machine.

BWT bestaqua Coffee with BWT bestdrink PREMIUM

The BWT bestaqua Coffee concept based on reverse osmosis technology is ideal for high water use and high salt content in raw water.

It allows corrosion risks to be minimised reliably, especially in the case of high local chlorine content. As well as protecting coffee and vending machines, the bestaqua Coffee concept guarantees the best possible taste for all hot beverages at all times thanks to its combination with BWT bestmin PREMIUM filter cartridges – worldwide, regardless of the local water quality.

BWT bestmin PREMIUM

- Perfect mineralisation for your water
- With the taste carrier magnesium
- For all coffee and vending machines
- Ideal downstream of reverse osmosis and for naturally low-salt water

BWT bestaqua Coffee

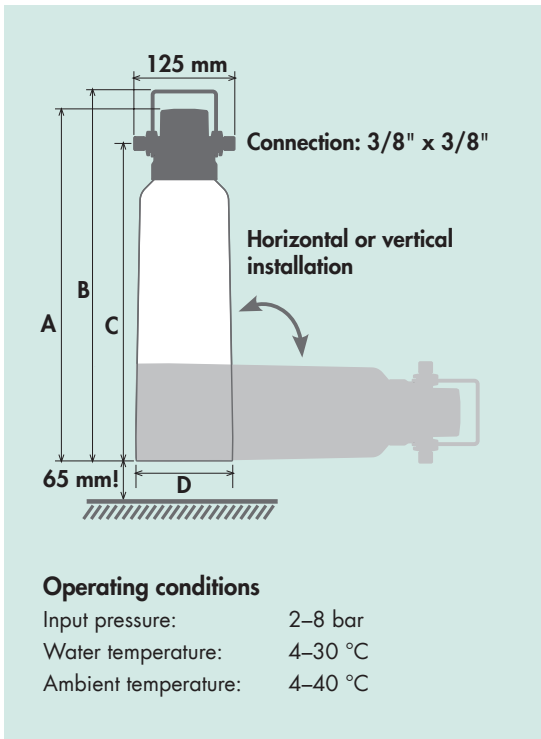

- Perfect water for all hot beverages
- Ideal for high water consumption and salt content
- Minimises corrosion risks by removing chlorides
- Best coffee water in combination with BWT bestmin PREMIUM filter cartridges

Technical data

BWT bestmin PREMIUM	Size M
Filter capacity in litres	10,000
Height without handle (A) in mm	475
Height with handle (B) in mm	500
Connection height (C) in mm	425
Ø filter cartridge (D) in mm	130
Weight in kg, (dry/wet)	4.0/4.5
Order no. for filter cartridge	

Accessories

	Anschluss	Länge	Bestellnummer
BWT besthead universal filter head	3/8" x 3/8"	–	FS00Y00A00
BWT bestflush ventilation and flushing valve	3/8" x 3/8"	–	FS00Y51A00
Connection hose	3/8" x 3/8"	1500 mm	FS00Y01F00
Connection hose	3/8" x 3/4"	1500 mm	FS00Y02F00
BWT test kit for hot beverages	–	–	YS00Y01A00

Product solutions from BWT water+more

Our products are unique filtration solutions for water optimisation in the catering industry:

- BWT bestmax – the all-rounder
- BWT bestprotect – the protector
- BWT bestmax PREMIUM – the taste expert
- BWT bestmax BALANCE – the natural one

With these products from BWT water+more, you can optimise any water, in any location, for any catering application in a targeted way. Use the experience and technologies of BWT water+more to supply your business and your processes with the best possible water efficiently. Find out more at www.bwt-wam.com.
